PERSONAL PROJECTS

Post management system using React.js [Site Link](#)

I have built a post management system with fuzzy search and Delete promise queue using Local Storage.

Tic Tac Toe Game with React.js [Site Link](#)

I have built a simple tic tac toe game using React.js. I have used useState and useEffect hook for this.

Ecommerce website front-end using React.js [Site Link](#)

I have built an Ecommerce Site with 100 products. The products data are fetched using dummy API from dummy data API site using axios package and useEffect hook. In this design I have implemented the features like sorting alphabetically or based on price and filtering based on category of the product. I also used the context API and useReducer Hook to manage the cart items. In this I have also used Ant design components.

Bootstrap Based website for a Electrical shop [Site Link](#)

I have built this site using Bootstrap CSS framework with fully responsive for all devices. I have added a form with proper validation using Bootstrap form component and scroll spy on navbar using vanilla JavaScript
